Experience

Data Engineer, Monlam Tibetan IT Research Organization) – Remote, India June 2024 – April 2025

- Built and maintained ETL pipelines to prepare linguistic data for OCR and speech models.
- Cleaned and prepared data for Wav2Vec, sourcing and storing datasets using Hugging Face Hub.
- Generated over 500 hours of high-quality speech-text paired data to support Wav2Vec fine-tuning.
- Contributed to Wav2Vec model improvement, reducing Character Error Rate (CER) from 30% to 15% through enhanced data quality and preprocessing.
- Performed web scraping to gather diverse text data; transformed raw datasets for NLP usage.
- Generated data augmentations for OCR and tracked model performance using visual analysis (Matplotlib).
- Managed documentation for transformation logic and business rules.
- Used Git/GitHub for version control, resolving merge conflicts, and collaborating via pull requests.
- Leveraged AWS and Vast.ai for scalable model training and deployment infrastructure.
- Maintained databases using MySQL and MongoDB; ensured data accuracy and consistency through validation processes.

Associate Software Engineer, Syncmonk Pvt. Ltd.– Bengaluru,India Jan 2024 – April 2024

- Built Fisheye using grafana for monitoring and visualization.
- Integrated Grafana with MongoDB via PyMongo and REST APIs.
- Monitored time sync using Linux PTP and SNMP protocols.
- Documented workflows and contributed to clean, modular codebases.

Frontend Developer (Freelance), Ritual Softech. – Remote, India Oct 2023 – Dec 2023

- Developed responsive web applications using HTML, CSS, JavaScript, and React.js.
- Applied media queries and Bootstrap for mobile-friendly design.

Education

Jabalpur Engineering College Aug 2019 – May 2023

Bachelor of Technology in Computer Science & Engineering | CGPA: 7.7/10

- **Coursework:** Data Analytics, Machine Learning, Artificial Intelligence, DBMS, Data Structures, Python Programming, SQL

Projects

Fundraising Data Analytics Reporting Project Jan 2025 - Feb 2025

- Developed end-to-end fundraising analytics by building ETL pipelines, optimizing SQL queries, and creating data models to track donor engagement and campaign performance.
- Designed interactive Power BI dashboards with dynamic filters and forecasting; ensured data accuracy through validation, documentation, and Git version control.

Customer Segmentation and Donation Trend Analysis Oct 2024- Nov 2024

- Conducted donor segmentation using SQL and clustering techniques to identify key fundraising groups.
- Created Power BI dashboards visualizing donation trends and demographics to optimize outreach and improve donor retention.

Skills and Interests

Programming & Data Tools : Python, SQL, Bash, Git, GitHub, REST APIs, MySQL

Data Analysis & Visualization: Excel, Pandas, NumPy, Matplotlib, Power BI(DAX), Tableau

Data Engineering & Processing: ETL pipelines, data cleaning, deduplication, web scraping, query optimization

Reporting & Collaboration: Dashboard design, data validation, Git workflows, pull requests, documentation

Cloud & DevOps: AWS (EC2, S3), Docker, basic Linux
